On John part

particle that comprises the compound and a costimulatory ligand comprising CD28 or a portion thereof.

(Amended) The method claim 1 wherein the compound is a nucleic acid molecule.

4. (Amended) The method of claim 1 wherein the compound is DNA that comprises a nucleotide sequence that encodes a protein operably linked to regulatory elements functional in the cell.

 $O_{i,j}$

- 5. (Amended) The method of claim 1 wherein the compound is DNA that comprises a nucleotide sequence that encodes an immunogenic protein operably linked to regulatory elements functional in the cell.
- 6. (Amended) The method of claim 1 wherein the compound is DNA that comprises a nucleotide sequence that encodes an non-immunogenic protein operably linked to regulatory elements functional in the cell.

8. (Amended) The method of claim 1 wherein the cell that expresses costimulatory molecules is a dendretic cell or a macrophage.

Sup3

13. (Amended) A method of delivering a therapeutic protein to an individual comprising

the step of administering to tissue of said individual at a site on said individual's body, a particle that comprises a nucleic acid molecule that encodes a therapeutic protein, and a costimulatory ligand comprising CD28 or a portion thereof.

Please add the following new claims.

22. (New) The method of claim 1 wherein the costimulatory ligand comprises the extracellular region of CD28.

- 33. (New) The method of claim 10 wherein the viral protein portion of the fusion protein comprises HIV-1 gp41 or a portion thereof.
- 34. (New) The method of claim 33 wherein said viral protein portion of the fusion protein comprises the transmembrane and cytoplasmic regions of HIV-1 gp41.
 - 35. (New) The method of claim 34 wherein said costimulatory ligand portion of the fusion protein comprises the extracellular region of CD28.
 - (New) The method of claim 35 wherein the compound is a nucleic acid molecule.
 - > 37. (New) The method of claim 35 wherein the compound is DNA.

- 38. (New) The method of claim 35 wherein the compound is DNA that comprises a nucleotide sequence that ercodes a protein operably linked to regulatory elements functional in the cell.
- 39. (New) The method of claim 35 wherein the compound is DNA that comprises a nucleotide sequence that encodes an immunogenic protein operably linked to regulatory elements functional in the cell.
- 40. (New) The method of claim 35 wherein the compound is DNA that comprises a nucleotide sequence that encodes an non-immunogenic protein operably linked to regulatory elements functional in the cell.
 - 41. (New) The method of claim 35 wherein the cell that expresses costimulatory molecules is a dendretic cell or a macrophage.
 - 42. (New) The method of claim 35 wherein the particle is a viral particle, a protein complex, a liposome or a cationic amphiphile/DNA complex.

REMARKS

Claims 1 to 31 are pending in the application. Claims 1, 2, 4 to 6, 8, and 13 have been
